

Risk Assessment – Last Man Standing

Hazard Area	Risk	Existing Controls	Likelihood 1 - 5	Severity 1 - 5	Risk Score L x S	Further Action to take
LMS	Danger of falling due to insufficient user height	The minimum height for any user is 1.2 meters. Anyone under this height may not be permitted to use the multiride unless they are able to mount the ride unaided	1	5	5	None
LMS	Danger of being struck by multiride attachments or it's users	Spectators are not permitted to lean over the inflatable bed at any time	2	4	8	None
LMS	Danger of unnecessary injury	Ensure that no one with a history of back or neck problems or who suffers from a heart complaint uses the Inflatable or anyone who is feeling unwell or suffering the effects of alcohol or drugs & Pregnant women may NOT use any equipment at anytime	5	1	5	None
LMS	Overloading or tipping over	No user weighing over 90kg or 14 stone is permitted to us the equipment at any time.	1	5	5	None
LMS	Unable to locate the safety cut off	Unfortunately, anyone who is visually impaired or blind are not permitted to use the multiride.	1	5	5	None
LMS	Adverse weather conditions	The multiride will be switched off in heavey rain and is not permitted to run in strong winds as both these conditions are a Health & Safety risk	Dependent on weather	Dependent on weather	Dependent on weather	None
LMS	Danger of injury from hard surfaces	The ride must never be mounted unless the inflatable bed is fully inflated whether the multiride is in operation or not	1	4	4	None
LMS	Injury through lack of supervision	A fully trained operator must be present with he bull at all times, in the event that the operator is not in view Do Not enter the any circumstances.	1	5	5	None
LMS	Injury through user collisions	Any user acting in a silly manner or spectators leaning over the inflatable bed	2	5	10	None
LMS	Injury through mechanisms	Hands and feet must be kept away from central roatator at all times, users are to be kept on their jump station	1	5	5	None
LMS	Tripping over anchorage points, spare equipment, electrical cables	Anchor points used as per manufacturers instructions and spare equipment erected safely or stowed away. Where possible electrical cables do not cross any public pathway.	1	2	2	In the event of large numbers of participants attending or large events, additional safety fencing is erected, electrical cables will be erected overhead or covered
LMS	Injury by collision after falling	After falling from the jump station the user must move back and rejoin the game once the rotating arms are out of the way	1	2	2	None
LMS	Unruly behaviour	The most important rule of all is that the operator's decision is final !! Refusal to abide by the operators guidance will result in ride refusal & in extreme circumstances closure of the attraction.	1	2	2	None
LMS	Choking	No food drinks or chewing gum to be allowed on or near the Inflatable.	1	4	4	None
LMS	Injury through 3 rd party items & 3 rd party bodies.	All shoes, glasses, jewellery, badges MUST be removed before using this Inflatable. Always ensure that the area surrounding the Inflatable is not overcrowded.	2	3	6	None
LMS	Danger of fire.	No smoking or barbecues near the Inflatable at any time.	1	5	5	None
LMS	Emergency	In the event that someone is seriously injured, DO NOT move the individual, leave the inflatable switched on and dial 999 immediately.	1	5	5	None
LMS	Injury through lack of inflatable pressure or suffocation.	Do not allow anyone to be on the Inflatable during inflation or deflation as this can be EXTREMELY DANGEROUS.	1	2	2	None
LMS	Injury through bouncing off the inflatable bed.	Ensure that an area of 6 feet (2 meters) around the unit is completely clear and ensure the area in which the castle is to be erected is completely swept of debris, before our arrival if possible.	1	3	3	None

L=Likelihood S=Severity L*S= Risk 1=Low 5=High

Risk is worked out using numbers 1 - 5. The likelihood is given a number and this is multiplied by the number given to the severity of the risk.

The result = the risk factor. This generic risk assessment is brief and we have our own individual assessments for each individual risk, 25 being the worst possible outcome, any item reaching 25 would give serious cause for concern & we would not be able to erect the unit. It is recommended that clients undertake their own risk assessment to suit their requirements.
